

cf. M.J. HERSKOVITZ "Peoples & Cultures of Sub-Saharan Afr" -- ANALYSES OF AM. ACADEMY  
of Pol. & Soc. Science, 3/55, p. 11  
TROPICAL AFRICA by Geo. H.T. Kimble, - 1960 20th c. Fund, NY, 2 vols.

(By far the most comprehensive vol., even though so fast and revolutionary are the changes in Africa, that already all it says on Br. & Fr. Afr. is outlived since they have their independence already, & even tho. its least significant part should havbeen the most--i.e. nationalism is beyond comprehension of the author. Nevertheless, because, very often, the Ind. is only nominal, & geog., ind., agric. exist as before, one can still gain something from this bk.)

#### Vol. I--Land & Livelihood

##### Ch. I--Eco. Life at turn of c.--Laborer, Characteristic Livelihoods, Standards of Living, systems of Land Tenure

p.8 claims that Sir Philip Mitchell's "The Agrarian Problem in Kenya" ('48) described E. Afr as Br. found them at about 1890 was same as about 1500, with no wheeled transport, no calendar or notation of time, "They were pagan spirit or ancestor proprietors, in the grip of magic & witchcraft, their minds cribbed & confined by superstition... & in 1890 were in a more primitive condition than anything of which there is any record in pre-Roman Britain." . . .

pp. 9 And yet he admits: "Altho primitive, now, of the existing culture of tropical Afr. were neither idle nor inept. On the social side they were often highly evolved... On the eco. side, they commonly showed a regard for the limitations of the earth, & a degree of ingenuity in putting it to work, that has not always been shown by more recent comers. & the men & women who labored to produce these cultures knew what labor was."

Ch. 2--Of Arts & Crafts  
p.22: "As Melville Herskovits points out in a recent paper, this tradition of specialization was responsible for a very considerable flowering of culture 100's of yrs. BEFORE the coming of the colonizers. It produced such recognized art forms as the Ife & Benin bronzes, the Ashanti gold weights, the Dahomeyan & Cameroons brass figures & the intricately designed Congo throwing knives." .. also the embellishments of houses & temples with carvings & paintings of a high order & the dev. of sculpture that from Guinea, & Sierra Leone to the Congo has given the world the masks, statuettes & other carved figures tht today have world-wide renown."

p.24, highly developed kingdoms, priesthoods & theological systems-- Mali, Tekur, Ghana, Borny, Songhai & Hausa--the Guinea coast kingdoms of Ashanti-Dahomey, Yoruba & Benin & those of Kongc, Lunde & Bushongo in the Congo... Beginnings of town life came early "for in the Arabic travel lit. of the 10th & following centuries. we are told of the existence of many cities in 'the Land of the Blacks'... a big trans-Saharan business in gold, ivory, salt, fabrics, & slave & HAVING THEIR OWN CENTERS OF LEARNING. Kano, in no. Nigeria, is estimated to have had a pop. of many ths. when it was 1st visited by Europeans."

##### Ch. 2--The Physical Frame, Relief Map, climate & weather, Vegetation, soils

##### Ch. 3--The Pattern of Population

p.84, 55-60 mln. "true Negroes" Kru (Liberia) Fanti (Ghana) Wolof (Senegal) & Yoruba (Nigeria)  
"pure" Hamites--35 mln. Ethiopia & Eritrea & Hamites Wassei

of Ruanda-Urundi, Uganda, Sudan, no Tanganyika & drier parts of Kenya  
The Bantu Negro (Abantu—"human being") incl. Kikuyu but excluding those  
living in So. Afr., number 55 mln.  
2 mln. Semites, esp. in "Zanzibar," The Malgache.

Estimated African population 167 mln. (only 1 mln. are non-Africans in Afr.)  
pp. 91-3 f.i. on 3 zones, W.E. & central

Less than 10% live in communities that have pop. of 5,000 or more. Those  
that exceeds 10 are Eritrea, Fr. Somaliland, Ghana, the Rhodesias, Zanzibar &  
possibly Ethiopia.

Most of large towns are European in origin: Dakar (230 th)  
Leopoldville (300th) Salisbury (150 th) Bulawayo (100 th) Nairobi (180 th)  
But many are African in origin: Ibadan (500 th.) (different  
either from Lagos or Leopoldville. "Noon or midnight, the streets are never  
empty, the women never far from their stalls, & the men never done with  
padding to & fro, greeting, smoking & gossiping.)

p. 100  
"Timbuktu, Gao & Kano were flourishing centers bet.  
750 & 1 th. yrs. ago & were known in Europe long before  
Prince Henry the Navigator's men had begun to push southward beyond Cape  
Bojador. The urban tradition of no. & e. Afr. goes back even further,  
at least on the coast from the Mozambique Channel northward. Sofala, Kilwa,  
Zanzibar, Mombasa, & Malindi were already gray with age when Vasco de Gama  
discovered them in 1498. .... One of these towns, Kawa, located 3 m. from Dongol  
was already a large town in the New Empire per. (1550-1100 BC)...  
Addis Ababa (300 th.) Omdurman-Khartoum-Khartoum No. (250 th)  
Tannarive (200 th)

Ch. 4--Farming the Land--Afr. agric; European agric.

THE PICTURES (PHOTOGS) ARE THE MOST BEAUTIFUL PART OF WHOLE BOOK  
OF PEOPLE & Land

Ch. 5--Settlement on the Land --Need for Land, The Problem of the Settler,  
Settler Schemes, Prospects

Ch. 6 The Wealth of the Woods

Ch. 7 --The Waters of the Land

Ch. 8--Food from the Water

Ch. 9 \*\*THE MINERAL REALM --The past 100 Yrs., The Problems of  
Prospector & Developer Mineralized Regions  
Mineral Resources & Prod., Trends. & Prospects.

Old Testimony--references "to the whole land of Havilah where there is  
gold" "the gold of Ophir" have a central Afr., perhaps so. Afr. context.

cf. KATANGA, p. 290 the Rhodesias (coal in so. Rhodesia;  
copper in No.) diamonds in Angola; diamonds,  
bauxite & manganese in Ghana  
Iron ore from Sierra Leone, Liberia, & Rep. of Guinea  
(p. 297-99)  
cobalt Uganda chrome ore (Mozambique) Uganda  
Egyptian tungsten Ethiopia

Ch.10--Ind. Progress--

p.371: "And because there were few specialists & next to no surpluses, almost every African was by necessity a mfr. His very survival hung upon his ability to make an axes & hoes & to wield them, to hollow out a canoe & paddle it, to handle clay & fire it, & to fashion skins, bark or fibres into clothes."

"The manipulative skills thus acquired - possessed to be sure by all primitive, preind. peoples--are helping the AFRICANS TODAY TO SPAN THE CENTURIES BET. HIS SIMPLE UNMECHANICAL WORLD & THE WORLD OF THE ASSEMBLY LINE, THE HYDRAULIC PRESS, & the acetylene torch. Already many thousands have shown that dexterity, fastidious regard for detail, a sense of timing & a feeling for tools are not so much matters of environment as of habitude & knack; & that proficiency in the traditional arts - crafts can be turned to acc't. in the sawmill, the foundry & the copper mine."

Cf. Esther Warner "7 days to Lomaland", p.39 for why "Johny" does not want work in factory.

Ch.11 The Changing Route Map --Factors in Dev.of Tr.Services  
Inland Waters Rds Ports&Ocean shipping  
Rds, Airways, The Trend

Ch.12 Merchandise, Marts & Mkts.

Ch.13 THE WKRS. --Afr. Labor Pool Use of Afr. Labor Migrant Wkrs  
Prob. of Afr. Advancement Non-Afr. Labor Wages

LABOR POOL: p.573--Trewatha & Zelinsky ("The Pop. of Afr") in the paper prepared for this study put it roughly at 26.5% of tot. pop. or approx. 44 mln."

But best of all things comes in ftn. on that p.573: "A RECENTRIKE IN THE NIGERIAN TIN FIELDS HINGED ON JUST THIS QUES. OF LOSS OF FREEDOM. THE LABORERS HAD ASSUMED THAT WHAT THEY WERE BEING PD. FOR WAS THEIR WILLINGNESS TO SURRENDER THEIR ILLNESS: WHAT THEY WANTED WAS TO BE PD. ALSO FOR THEIR WKS."

p.574: re who built the country anyway "Without the African-stone breaker, ditch-digger, cement mixer, hod carrier, bush whacker, porter, servant & general factotum things would still be very much as they were 50 or 100 yrs ago. In a very real sense the tropical Afr. of today is the wk. of the African's hands; almost EVERY rrd., highway, harbor, pub. & pvt. bldg., mine, plantation & European farm is a monument to his physical exertions."

\*\*\*\*\* VOL. II: SOCIETY & FOLLITY

Ch.14--The Old Order--

The Family, The  
Community Education Religion the Arts  
Health & Disease

Ch.15--SOCIAL CHANGE

Ch.16 --The Assault on Ignorance (incl. Mass communications Media) The Afr. Press, pp.142-8 In Sierra Leon in early 19th c. that 1st tropical paper for & by Africans printed. In Nigeria alone there are 30. p.143: "By Est. standards their aggregate circ. is small, smtg. to perhaps 400,00. The readership however is large. PROBABLY NOWHERE ELSE IN THE WORLD DO NEWSPAPERS GET READ SO OFTEN; SO COMPLETELY & OVER SO LONG A PER."

Ch.17 The Assault on Sickness

(AGAIN PICTURES ARE BEST PART OF BK)

Ch.18 --Rise of Voluntary Org. (incl. T.U. of which the author understands very little) Most headway made in '40s, pp.213-215, esp. p.215 which shows Boss-black rel.

Ch.19 --Colonial Policies, Belgian, Br., Fr., Ital., Portuguese & Sp.

Ch. 20 - NATIONALISM & POLITICS (author's weakest chapter either  
in ideology or people or leaders)

He does mention Registers p. 272 "in upper Senegal (1886-88) under the marabout Mamdu Lamine; in Dahomey (1890-93) under King Behanzin; in So. Rhodesia (1924) under the Matabele King, Lobengula; and in Tanganyika (1991-4) under Mkwawa, paramount chief of the Hehe."

has sec. on US, pp. 279-81 which quote Hodkin on Garveyism as "the most imp. single outstanding stimulus" to Afr. Nationalism, 1914 then 5 PanAfr org'd. by DuBois & others "along the lines of Garvey conventions" which shows how little author understands of fight bet. Garvey & DuBois--but does consider N. press, Azikiwe, etc.

Again on pp. 283-4 where author deals with C-ism without any ref. to 1919-24 era shows how little he understands of that & then mentions only Jomo Kenyatta & founder of W/Afr/Youth League; Ledipo Solanke, leader of W.Afr. Students Union, as early as 1927 had affirmed (quoted from Coleman's unpubl'd mss. "United W.Afr." L "It took the wh. race a th. 7rs to arrive at their present level of advance; it took the Jap., Mengol race, 50 yr to catch up..there is no reason why we WAfrs should not catch up with the Aryans & the Mongols in c.")

Ch. 21 The Machinery of Govt.
